

BULK IN

RECIRCULATE FLOW

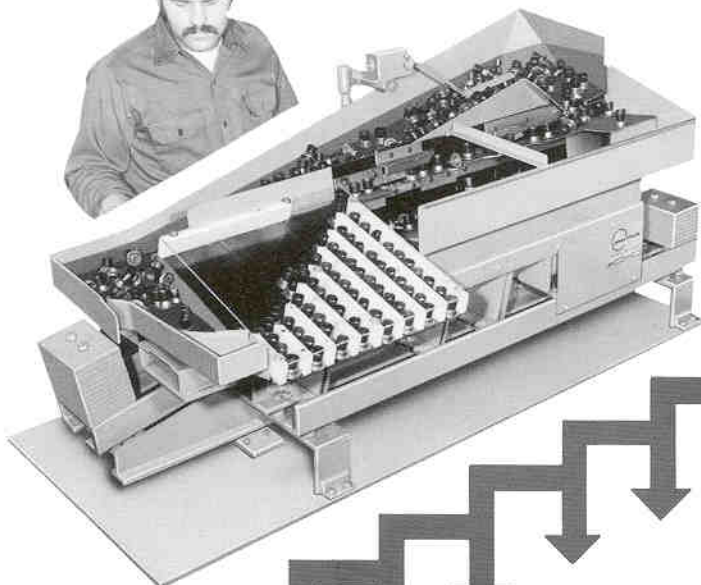

RESERVOIR

This **Spectrum** straightline feeder gets Valve Keeper Subassemblies oriented and distributed to eight paths at sixty, per minute. Sorting tooling is included to get rid of tramp material and incomplete assemblies. Sound pressure is less than 85 db.

Compare our unit with four or eight bowls trying to do the job. Now look at your feeder needs.

Don't buy...

... bowl feeder noise. See what **Spectrum's** straightline will do – quietly.

You'll get hardened steel tooling to orient, inspect, distribute and live feed your parts – quietly.

Kick the bowl habit; you'll feed better.

Call or write to learn how **Spectrum's** straightline will do **your** job better – quietly.
