

These super hard, ball joint sockets react to handling like sleigh bells.

Work hardening manganese steel tooling was used to fight wear and designed for best efficiency.

Orienter efficiency and standardized noise control features held sound pressure below 85dBa.

Extra control features could limit noise to 80dBa, if desired.

Quiet feeders...

... by Spectrum, do **more for less.**

Efficient tooling and standardized noise control are **the** keys to cost effective, quiet feeders.

Call, write or drop in for cost effective parts feeder solutions.
