

Noise control and reliable orientor performance has convinced many **Spectrum** customers to automate the feeding of Connecting Rod Caps like these.

They are fed, easily, at 45 pieces per minute with less than 85 DBA sound pressure. Yes, we can get sound below 80 DBA.

Are you still feeding parts by hand? See the **Spectrum** people. You'll Profit.

Manhandling...

... any part costs you extra money.

Then why feed parts by hand?
