

Totally enclosed Maxiflex contains the noise of parts flow. Parts view slots are optionally available.

Splice clamps, bank level sensors, and mounting brackets are available for Maxiflex to assure least cost installation and trouble free performance.

Maxiflex rolls with the punch while fabricated track chokes up the flow.

# Maxiflex feed track...

... is custom made, by Spectrum, to suit your part feeding needs.

Flexible, yet durable; Maxiflex features hardened steel part contact surfaces and a chemical resistant outer sheath.

Maxiflex slips through crowded areas and gets parts to moving tooling where fabricated track is impractical.

Need a quick solution to a sticky track problem? Go Maxiflex with Spectrum; the feeder people.
