

# “Big, Heavy...”

... Parts are auto-fed reliably.

Tooled to handle Billets of 1-1/4 to 3-1/4 inches diameter by 5 to 10 inches long, this machine **easily** feeds ten pieces per minute.

Billets are stored, elevated, and **conveyor** oriented, reliably, for tracking to process. Recirculation is rare in this **non-vibratory** orienter for quiet, long term performance. The concept is modified to handle 24 inch lengths, reliably, without jackstrawing.

Don't let size and weight limit your automation efforts.  
Ask us for big or small parts feeding solutions.
