

It's No Secret...

Spectrum's got the hottest team in the parts feeding business.

Know why? We've got a powerful combination of experience, drive and customer appreciation that can't be beaten.

But why not see for yourself; you're always welcome at Spectrum. We've got the *best* answers to your parts feeding and assembly problem.

Here's a husky machine that gently feeds cold formed torsion bar anchors to a chucker for trimming.

Specially engineered elevator cleats and efficient orientor tooling virtually eliminates recirculation and parts abuse.

The four pound parts are end selected and escaped, rolling, to a magazine at 20 pieces per minute (2½ tons per hour).

They said it couldn't be done gently. So we did it.

TRY US.
