

Here is a **Spectrum Storage Feeder** that *gently* handles a family of five ball studs without tooling changeover. Parts are oriented, distributed and released *quietly* through four feed tracks at 50 pieces

per minute for automatic cross hole drilling.

Why not use quiet, gentle, cost cutting **Spectrum** machines in *your* efforts to survive?

## Noise ...

... Doesn't *have* to be a production feeder byproduct.

The folks at **Spectrum** build money making feeders that do *your* work gently *and* quietly.

Use the **Spectrum** team of quiet feeder specialists to automate *your* operation. Call or write for the *best* answers to your parts feeding and assembly problems.
