

These ball joint parts are live fed, direct to the fixtures of an automatic assembly machine. No troublesome gravity track.

Parts are gently stored, oriented and live feed tracked at 30 per minute at less than 80 dBA sound pressure.

Dependable parts feeders contribute greatly to assembly performance.

Get yours from **Spectrum; the dependables.**

Don't kill...

... production performance with just any feeder.

Choose **Spectrum** feeders for the best ideas and reliable performance.
