

Simple, quickly adjusted, orienter tooling sorts out tramp materials and feeds this family of bearing races for process, assembly or packaging operations. Changeover from part to part takes less than twelve minutes.

The twenty cubic feet storage feeder delivers the

largest part at 350 per minute while the smallest race is fed at 650 per minute.

Simple, easy access, noise control features limit sound pressure at 85 dBA.

Beware of ...

... feeder quotes bearing lowest prices and brief descriptions.

You'll find full information and competitive pricing in every **Spectrum** proposal.
