

These two feeders were retired at the end of a production run. Our customer asked us to rework, update and retool them.

Within a week they were refitted with **Spectrum's** better-performance features, re-tooled and noise controlled at a fraction of new equipment cost.

Got a feeder (any make) that should work better or quieter? Call **Spectrum**; the feeder team.

Putting Up With...

other feeders that aren't working right or making too much noise?

Call or write **Spectrum** about parts, service and noise control for your other feeders.

Spectrum; the feeder people.
