

Plain and flanged cone type lock nuts are fed at 250 pieces, per minute, to a coining press.

Perfect orientor performance gets the 7/16 to 15/16 inch hex nuts to the die without fail.

Quick change orientor and track tooling permit fast change-over from part to part with minimal downtime.

Feeder sound pressure is within 85 decibels.

Fast, flexible, reliable and quiet; Spectrum of course.

Fast rate ...

... Spectrum feeders pay-off quickly.

Simple setup features handle whole families of parts.

Beat your competition with a Spectrum feed system.
