

Hardened, adjustable and replaceable tooling makes the Spectrum straightline orientor system best for fasteners.

These parts are fed to a Prutton at better than 450 pieces per minute.

Floor bin storage reduces stock handling labor.

Larger bins and external track are available.

Optional features will control sound to 80 dBa.

Thread rollers...

... will starve you if they're not well fed.

Give yours a full diet of studs, bolts, screws and nails with Spectrum feeders.

Call, write or drop in for feeders that really satisfy roller appetites.
