

Assembly gaskets, a family of sizes, are stored, oriented, sorted for malformation, escaped and dual chuted to a process machine at 45 pieces per minute.

Despite unusual burrs and warpage, the thin

(0.014 in.) parts are reliably handled in the unique, hardened steel tooling.

Minimal down time is required for setup of the quick change bolt-in tooling.

Noise is less than 80 dBa.

## Compact, versatile, competitive...

... straightline parts feeders by SPECTRUM.

Bolt-in, hardened, quick change tooling for small parts feeding trims your production costs.

Call, write or drop in and see our PARA model straightline feeders in action.
