

Steering joint preforms are stored, elevated, oriented, tracked and escaped at 40 pieces per minute.

These 6¼ pound steel parts are efficiently oriented to control part abuse and hold a noise limit of 80 dBa.

Duty rated parts feeding equipment and tailored special tooling made this project an up-front performer.

We're up-front...

... with parts feeders.

Use Spectrum's quality, duty rated machines for quick payback and long term profits.

Call, write or drop in and you'll profit; up-front.
