

Using quickchange, high performance orientor, distributor and track tooling, this Spectrum storage feeder gets a family of nine tube fitting nuts to three taper spindles at 45 pieces per minute.

Total changeover, from part to part, takes less than six minutes.

Sound pressure is less than 85 dBa without extra enclosures. High efficiency tooling makes it possible.

Spectrum; the house of profit making feeders; for you.

# Quickchange, straightline...

... feeder tooling by Spectrum!

It's **your** solution to auto feeding families of parts profitably.

Call, write or drop in and let the straightline specialists quickchange your setup time into profit.
