

This twelve cubic feet storage feeder gets two rolling paths of Piston Pins (7/8 to 1-5/8 inches diameter by 2-3/4 to 4-1/4 inches long) to a web drilling machine. Production is 1800 pieces, per hour. Changeover takes less than 30 minutes.

Sound pressure is limited to 85 decibels by low cost noise control options.

Stamp out noise with common sense; Spectrum's that is.

# Quiet!

Most **Spectrum** feeders *are* that way.

We've got some options that limit sound at 85 decibels.

You'd be surprised at our sensible prices for quiet feeding.

Surprise yourself. Call or write the **Spectrum** team for the best answers to your *quiet* feeding problems.
