

These servo pistons are stored in a 12 cu. ft. bin, elevated, oriented, distributed to two paths and tracked to a pair of chuckers.

Parts are oriented and distributed with non-mechanical functions at 30 pieces per minute.

The user sees lower total costs through the use of **Spectrum's** low maintenance, non-mechanical features.

Noise is controlled to less than 80dBa at 3 feet.

Simplicity is the key...

... to lowest total costs.

Get **Spectrum's** simple solutions for your auto-feed needs.
