

This feeder assembles a family of bolt blanks to flat or concave washers, from bulk, through amazingly simple tooling. No mechanical functions are used.

Assemblies are fed to a thread roller which produces finished bolts with captive washers at 90+ per minute.

Bolt blanks can also be fed without washers for full machine utility. What more can you ask? Call Spectrum.

Together, BETTER, with...

... Spectrum.

Yes, Spectrum's way gets 'em together for you ... better.

The leader in parts feeding does more for you.
