

Spark plug shells come in many shapes and sizes. **Spectrum** feeds most of them.

Whole families of shells can be fed, by a single feeder, with quick change tooling.

Shells can be fed up to 150 per minute; even with

radial side wire orientation. Sound pressure is easily held to 80 dBA.

**Spectrum** feeders: Productive, Adaptable and Quiet!

What more do you need?

# Take a GOOD look...

... at bowl feeders.

See how they rattle **all** the parts. They make noise, abuse the parts and wear fast.

Now consider **Spectrum's** straight-line feeders for quiet, gentle treatment.

Call, write or drop in and check **all** the straight-line feeder benefits.
