

Fill plating or heat treat baskets. Meter to furnaces or preload bulk product packages for final count. Spectrum does it well.

Spectrum's bulk storage feeders are used to batch weigh or flow-meter bulk parts reliably and economically.

This 28 cu. ft. bin and elevator unit has a recycling batch weight unit to accurately load a furnace conveyor at optimum capacity.

Choose a standard Spectrum bulk feeder (3 to 70 cu. ft. capacity) and we'll add flow-meter or batch bulk devices to suit the job. You'll profit.

# Second to none...

... is the value rating for Spectrum parts feeders.

Yes, you get more for your money from Spectrum.
