

Four different Brake Cylinder Castings are dumped, stored, elevated, oriented, live feed tracked, and presented for robotic pickoff at eight pieces per minute.

Two quickchange, bolt-in tooling units take the

guesswork and time out of changeover.

Tooling setup time is less than 30 minutes.

Future casting designs can be added with extra tooling units.

Cash in on...

... the benefits of feeding parts families.

Job shop and short order production of parts varieties is done at least cost with multi-tooled single feeders.

Treat yourself to the best and latest in automatic parts feeding.
