

57 variations of...

hydraulic hose couplings are assembled in less than 3 seconds each.

Individual feeders are used to store, elevate, orient and deliver the three parts for each assembly.

Quick change tooling handles 49 different Stems, 6 Nuts and 8 Shells that are fed to a three tiered live feed track.

Stems, Nuts and Shells are presented one above-the-other into jaws for spearing and stripping into assembly onto a final live feed track.

Quick change tooling gets an assembly changeover done in 10 minutes.

Sound pressure is 82 dB(A) at 5 feet.
