

CASE STUDY

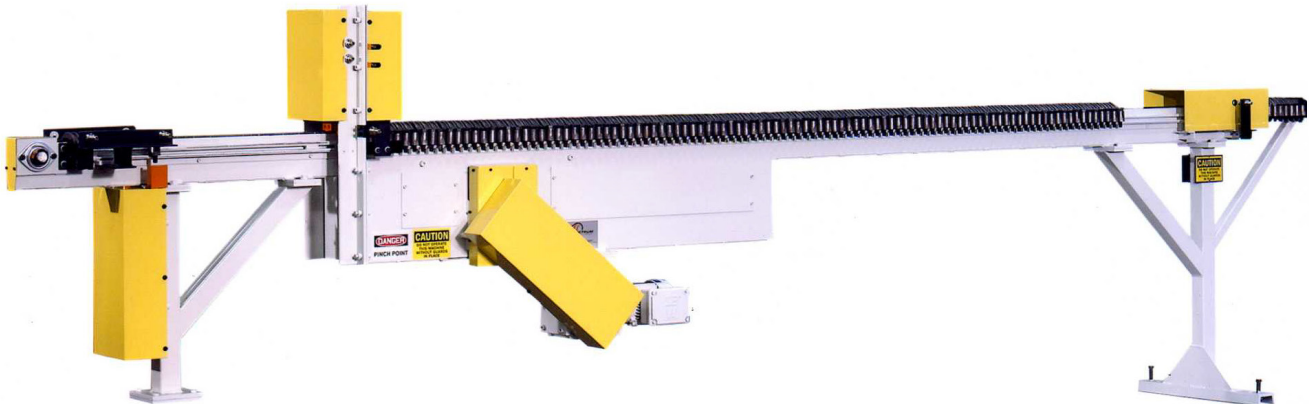

Custom Conveyor Stores 120 Parts

An HGA Company

Spectrum Automation offers customized conveyance systems for a wide variety of industries and applications. In this custom conveyor designed for a customer, differential bearing caps, with bolts, are manually placed on the conveyor to protect the joint faces.

It stores 120 parts in a face-to-face attitude for delivery to assembly. Caps are released and staged in pairs on 8.55" centers, for robot pickup, at 24 seconds per cycle.
